

THE CITY OF MIDDLETOWN

The City of Middletown sits in the south central portion of Des Moines County, just west of Burlington and a bit south of Highway 34. The City was looking to remove a burdensome property (old school building) from its expense sheet and applied to the program for assistance. The City had previously applied for funding during the inaugural grant round. The project was not funded but they implemented the notes they received from the review committee on strengthening their application and secured funding for the second round. The City applied for funds to cover an asbestos inspection. They plan on applying again next year for abating the asbestos that was identified from the inspection.
